

Pedro Henrique Leocadio Souza Berçam

Backend Java & Spring Ecosystem Developer

Computer Science Student | GitHub: github.com/Bercam

Dear Hiring Manager,

My name is **Pedro Henrique Leocadio Souza Berçam**, a Computer Science student and software developer focused on Java Backend development and the Spring ecosystem.

I have practical experience developing applications using **Java, Spring Boot, Spring Data JPA, Hibernate, REST APIs, PostgreSQL, and MySQL**, as well as tools such as **Docker, Maven, Git, and Postman**. My focus is on building organized, scalable, testable solutions guided by software engineering best practices.

Throughout my projects, I have been applying concepts such as layered architecture, DTOs, global exception handling, relationship modeling, persistence with JPA/Hibernate, and integration with external APIs.

GitHub: github.com/Bercam

Among my work, I highlight Java API and corporate system projects, including an employee management API featuring CRUD operations, entity relationships, database persistence, and application structure built according to backend development principles. I have also developed applications using PostgreSQL and MySQL, gaining practical experience in persistence layer implementation as well as data modeling and manipulation.

My goal is not only to implement features, but to deliver sustainable, future-proof software, prioritizing code quality, separation of concerns, maintainability, and efficiency.

I am analytical, self-taught, and problem-solving oriented, maintaining a constant routine of technical growth and striving to apply modern technologies and practices from the Java/Spring ecosystem.

I believe my combination of technical knowledge, practical project experience, and commitment to quality can directly contribute to your team's goals. I am eager to work in environment where I can drive results, take on responsibilities, and continuously evolve as a technology professional.

Sincerely,

Pedro Henrique Leocadio Souza Berçam
